Subject: Re: Structure of additional PFAS of interest

Hi Carla,

If that time is good for the others, it's fine with me.

Thanks,
Gloria

Hi all,

Cheng thinks we should have the additional results ready towards the end of this week. Would a call on Thursday the 28th work? 3pm is our usual meeting time, but other times that day could work as well. Otherwise we can look into available times next week.

Once the results are compiled we will send you a summary before we "meet."

Best,
Carla

Hi Gloria,

Absolutely (hi Andy and Mark!). I'll work with Cheng to figure out when we can get these next sets of results ready, and then we can schedule the next call.

Best,
Carla

Subject: Structure of additional PFAS of interest

Carla,

Mark Strynar (copied here) sent me the structures of the PFAS that were found in the drinking water and blood serum of Wilmington, NC residents. As mentioned yesterday, GenX was also present in their drinking water but was not found in their blood serum.

Mark also explained that the structures of Solvay Product congeners are Markush structures, and it is not known which of the structure(s) is present in the Solvay Product. **MARK – Please feel free to explain this to Carla and me more clearly.**

Mark and I think it would be helpful if he, Andy Lindstrom (also copied here), and the other two EPA chemists who are working on both the NJ and NC projects participate in the next call with you about your protein binding modeling results for these chemicals. Is this okay with you?

Thanks again for your help!

Best regards,
Gloria

Subject: [EXTERNAL] RE: PFAS of interest

Gloria,

Here are the structures for Nafion BP2, PFO4DA, PFO5DoDA, and Hydro-EVE. Here are the corresponding hyperlinks (in blue) to them in the DSS TX Chemicals dashboard. I pasted these as images so they will not work. But if you here they are hyperlinked below

Nafion BP2 <https://comptox.epa.gov/dashboard/dsstoxdb/results?search=DTXSID10892352>

PFO4DA <https://comptox.epa.gov/dashboard/dsstoxdb/results?search=DTXSID90723993>

PFO5DoDA <https://comptox.epa.gov/dashboard/dsstoxdb/results?search=DTXSID50723994>

Hydro-EVE not in production database yet. See attached structure.

Mark

PFESA BP2; Nafion BP2

CAS: 749836-20-2

DTXSID10892352

PFO4DA

CAS: 39492-90-5

DTXSID90723993

PFO5DoA

CAS: 39492-91-6

DTXSID50723994

Formula: $C_8H_2F_{14}O_4$
[M-H]⁻: 426.9657

Hydro EVE

CAS: 773804-62-9
